

Optical Switches Optical Switches are available at Mouser Electronics. Mouser offers inventory, pricing, & datasheets for Optical Switches Optical Switches.

The Optical Switch, Matrix 2X16, OMM2X16-2 is a high-performance fiber optic switching system designed for precise signal routing in telecommunications, automated testing, and optical research.

This switch offers a combination of 16 GE optical ports and 2 \times 2.5G electrical ports, providing flexible connectivity options for various network environments.

This rack-mount device is designed with DiCon's proprietary 3D MEMS mirror technology and delivers industry-leading optical performance. The unit works without any position sensor or feedback loop, ...

DCS-W16-S is an all-optical 16×16 matrix switch designed for high-throughput, low-latency interconnection between multiple input and output fibers.

MEMS Optical Matrix Switch Module is built with DiCon's proprietary MEMS technology. Each module contains 2 sets of MEMS mirrors for making 1-to-1 connections between input and output ports. The ...

The SC216D-000058 2x16 Optical Switch is a fiber optic switch designed for high-performance optical signal routing. It features 2 input channels and 16 output channels, utilizing ...

Rackmount 2X16 Optical Switch (single mode,multimode,850/1310/1550nm) is a kind of two input fibers and 16 output fibers optical path control device.

The 2x2F Bi-directional Fiber Optic Switch connects optical channels by redirecting 2 incoming optical signals into 2 output fibers. This is achieved using a opto-mechanical configuration and activated via ...

The CL Series 16×16 fiber optical switch connects optical channels by redirecting an incoming optical signal into a selected output fiber. This is achieved using patented non-mechanical configurations ...
