Overview IT security products Applicable products Implementation rules Administration On April 27, 2009, China announced 13 categories of the IT security sector products that must conform to the additional authority that was newly bestowed on the CCC (China Compulsory Certificate), and this requirement was to be put into effect on May 1, 2009. In view of the security measures taken by China, there was a seemingly high likelihood that they would request the full disclosure of all source codes running on any and all devices, imported or otherwise. The divulgence of such source codes is of grea...
