

3m line detector used when there are many optical cables

Cable and Pipe Identification: The 2273 can differentiate between various types of cables and pipes by analyzing the signal response. This helps users distinguish between power lines, communication ...

3M(TM) Dynatel(TM) EMS-iD Marker Locators 1420 are high performance locators that quickly and efficiently locate most types of conventional electronic markers and have the capability to read/write to 3M(TM) ...

Discover the 3M Dynatel Locator 2573X, designed for precise cable and pipe locating. Lightweight, user-friendly, and equipped with GPS for efficient mapping. Ideal for professionals.

3M(TM) Dynatel(TM) 2550XE/2573XE Locator is capable of locating cable and pipe. This locator has simplified integrated interfaces with precision locating capabilities, six active frequencies for direct ...

Wide range of 3M (MMM) Locating & Marking Systems & Solutions for accurate underground utility detection, improving safety and making your job easier.

Underground utilities may be hidden, but it's still important to know exactly where they are. 3M(TM) Locators and Markers provide a complete system for locating, marking and mapping vital ...

Discover the 3M Dynatel Locator 2573X, designed for precise cable and pipe locating. Lightweight, user-friendly, and equipped with GPS for efficient mapping. ...

The 3M(TM) Dynatel(TM) Locator 2273M series is designed to find the path and estimated depth of buried cables, pipes and markers, and the ability to find underground faults.

This Dynatel pipe locator features a microprocessor-based system that utilizes advanced digital signal processing to swiftly and efficiently determine the location of sheath faults and trace the paths of both ...

The rugged, highly sensitive receiver uses two active trace frequencies and provides a bar graph, signal strength and direction indication to the pipe/cable. In addition, the receiver is designed to detect ...
