Just connect the SAS controller built into the system board to the SAS expander and it splits out the connectivity like a network switch. There is no advantage in having another controller, ...

To update to the latest release on your 2U or 4U machine please see the software user guide sub-chapter System Requirements.

Browse downloads by product and explore popular and new Ubiquiti applications.

How to download the latest UniFi switch firmware and upgrade manually using SSH and CLI commands

You should be able to update it through System Settings without issue, but if it does brick at least you've got a compatible flashcart and can just fix it. Tekniquez
