

Cisco SFP-50G-SL Short Link Modules are a replacement for traditional AOCs (Active Optical Cables). They are suitable for very short distances and offer a cost-effective way to connect ...

Home > Products > Active Products > 50G Optical Transceiver Modules > 50G LR BiDi QSFP28

Compared to other optical modules (such as SFP28 or QSFP modules), the 50G SFP56 module offers higher port density and advantages in power consumption and cost control.

The module is fully compliant with all SFP56 related MSA standards and Digital Diagnostic functions are available through an I2C interface. SFP56-50G-SR complies with IEEE 802.3 and 50Gbase-SR.

This module leverages high-stability CWDM DFB lasers to deliver cost-effective 40Gbps transmission over single-mode (SM) fiber up to 2km. Utilizing a standard LC interface, it dramatically reduces core ...

Complete guide to 50G transceivers. Learn about types, applications, specifications, and how 50G fits into modern network infrastructure.

The 50G SFP56 optical transceiver is in high demand for its ability to achieve high-capacity data transmission and ultra-low latency with low power consumption, targeting the next-generation ...

AscentOptics" 50G SFP56 optical transceivers offer customers a wide variety of high-density and low power 50G and 25G Gigabit Ethernet connectivity options for data center and high-performance ...

The 50G SFP56 BiDi optical module for 5G fronthaul can multiplex the 25Gb/s BiDi optical module BOSA scheme and 50Gb/s dual-fiber bidirectional optical module industry chain, and ...

Superxon 50G ONU transceivers, compliant with QSFP28 MSA, support single-fiber bi-directional data links with asymmetric TX and RX rates: 24.8832Gbps TX and 49.7664Gbps RX. Hot-pluggable, ...
