

A 66kV Control Relay Panel is a specialized electrical panel designed for high-voltage applications, specifically for controlling and protecting electrical equipment at 66 kilovolts (66kV).

It is applicable for substation or power plant transformers at the voltage levels of 66KV or less. Two fundamental CPU modules are provided. One of them is a relay constructed of the 32-bit ...

The GWZC-9651 PT Protection Relay is designed for voltage transformer (PT) protection and monitoring in 110kV and below substations.

We also provide Transformer Protection Panels and Substation Control Panels, designed using high-quality components and advanced protection relays. Panels are built as per customer drawings, ...

1.01 This Technical specification covers design, manufacture, inspection, testing at works and supply of control and Relay panels, annunciation equipments synchronizing trolley and other ...

We are prominent manufacturer and supplier engaged in offering a complete range of C& R Panel. These are manufactured from fine quality raw material. We have an experienced team of diligent ...

This document specifies the requirements for protection panels associated with 36kV and 72kV outdoor switchgear and 33kV and 66kV transformers. It is also specifies the requirements for ...

Medelec designs protection and control panels to cater for various applications according to customer requirements, using latest technology relays which are supplied by Schneider Electric, ...

Special Profile Gasket Used for Dust Protection. Control Cable Entry either from Bottom or Side Top. Earthing Bus of Size & Material as per requirement.

Product Overview : GWZC-9611 Line Protection Relay is designed for the protection of 33kV & 66kV transmission lines and feeder circuits, featuring easy installation and simple ...

Our panels are available in a range from 6.6KV to 66KV. We use latest controller and protection relays for reliable and durable solution. We give total package for power management by single step.
