

# A 200m fiber optic connection requires a gigabit router

Unlike regular routers made for slower DSL or cable, a fiber router can handle the high speeds and large data amounts that fiber optic technology provides. This means you will not face slowdowns or issues ...

Instead, it requires an Optical Network Terminal (ONT) -- a device supplied by your fiber provider that converts the light-based signal traveling through the fiber-optic cable into a data signal ...

Yes, fiber internet requires specific equipment including an Optical Network Terminal (ONT) and a compatible router. The ONT converts fiber-optic ...

Explore how fiber optic internet is installed in your home, with step-by-step details on cables, ONTs, routers, and what to expect during the appointment.

Yes, fiber internet requires specific equipment including an Optical Network Terminal (ONT) and a compatible router. The ONT converts fiber-optic light signals into electrical signals your ...

The short answer is no. Fiber internet connections do not use traditional modems. Instead, they typically rely on an ONT, which is short for Optical Network Terminal, or a fiber optic modem. These devices ...

However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. In this guide, we'll walk you through how to connect a fiber optic...

Setting up a fiber internet connection requires understanding key hardware components and following a specific connection sequence to establish your home network. This guide details the ...

Fiber internet doesn't need a modem but requires an ONT to convert fiber signals for your router. Learn how fiber ONT works and how to set it up properly.

The good news: Fiber-optic internet does not require a special router in most cases. Since the ONT handles the signal conversion, you can use virtually any quality router that supports ...

If you're paying for gigabit fiber service, make sure your router supports at least gigabit Ethernet ports and dual-band or tri-band WiFi (like WiFi 5 or WiFi 6).
