

Distribution boards, together with modular ABB system pro M Compact protection devices and Modular Din Rail Components, can be used for many applications in electrical building installation.

Small Equipment (No External Dimension More Than 50 cm)

The switchgear is provided with a continuous electrolytic copper earth-ing busbar, with a cross-section suit-able for the proper switchgear short-circuit rating and pre-set on both sides for connection to the ...

ABB busbar systems enable safe and easy cross-wiring of miniature circuit breakers, residual current devices and other Modular DIN-Rail products.

ABB Library is a web tool for searching for documents related to ABB products and services.

ABB Z-busbar offering is available for 400A, 630A, 1600A and 2500A, to be used either as TN-C or as TN-S with a protected N-bar. The Z-busbar system is used with InLine XLBM and ZLBM and it has a ...

The modular and scalable design, the advanced portfolio and the electrical and mechanical features make System Pro E Power Rear Busbar System a compact-high performance solution for premium ...

System pro E power is the innovative ABB's main distribution switchboard solution with rated current up to 6300A and short-circuit current up to 120kA.

Due to busbars generally being made of aluminium or copper, they have superior thermal properties and electrical conductivity. The ABB busbars range offers busbars suitable for single, double, triple, or ...

ABB can produce a wide range of special sections of busbar to suit a wide variety of applications and unusual issues that may arise. Some of these special sections are detailed below.
