

Available in boxed lengths of 22 m or 110 m, the 801 Anti-Static Tinsel is easy to use and install, requiring only a connection to earth. The 801 Anti-Static Tinsel is designed for effective static control, ...

Anti-Static Copper Tinsel is of high quality 100% copper construction. The core is made of copper wire to ensure positive grounding and strength. Fine, sharply pointed copper strands provide greater static ...

Constructed from 100% high-quality copper, it features a conductive core for reliable grounding and fine, sharply pointed strands for effective static discharge. The optimized strand spacing maximizes ...

Our Anti-Static Copper Tinsel is precision made copper tinsel with a solid copper wire center. The tinsel is a 1-1/4" diameter that can easily be cut to fit your application.

We offer a comprehensive range of Conductive, Dissipative and Anti-static sheets for a wide array of applications. Friction induced electrostatically charged parts can be risky for humans and areas ...

Our Anti-Static Copper Tinsel features finely crafted copper strands with a solid copper wire center, ensuring superior conductivity. Effectively eliminating static charges from paper, plastic, and cloth ...

Protect your sensitive electronic components with our Antistatic ESD Foam & Bubble Wrap! Available in conductive and antistatic options, our foam ensures safe storage and shipping. Shop now for sheets, ...

Tinsel is made of ultra conductive 100% copper strands, and eliminates static through the "self-energizing" or induction principle. The tinsel is placed across, above and in close proximity (1/8" to ...

Tinsel is made of ultra conductive 100% copper strands, and ...

Choose from our selection of conductive copper foil electrical tape, antistatic electrical tape, conductive mesh electrical tape, and more. Same and Next Day Delivery.
