

This transceiver is a high-performance module for short-range multi-lane data communication and interconnect applications. It integrates eight data lanes in each direction with 8×25.78125Gbps ...

Digital diagnostics functions are available via the MDIO. The transceiver modules are RoHS-6 compliant and lead-free.

FIBERSTAMP's 200G QSFP-DD LR4 Optical Transceiver modules are designed for using in 200Gigabit Ethernet 10km links over SMF single-mode fiber. They are compliant with the QSFP-DD MSA and ...

The 200G QSFP-DD SR8 Transceiver is designed to transmit and receive serial optical data links up to 28 Gb/s data rate(per channel) over multi-mode fiber. It is a small-form-factor hot pluggable ...

The QSFP-DD (Quad Small Form-factor Pluggable - Double Density) form-factor is used for 200G, 400G and 800G applications and is backward compatible with lower speed QSFP+, QSFP28, ...

In this comprehensive guide, we will explore how QSFP DD works, why it has become a preferred optical module standard, and how it is deployed in modern data centers.

Eoptolink's QSFP28-DD is addressing three technical challenges for Ethernet switch and router vendors. The transceiver can be used to offer 200G point-to-point interconnections.

This blog will discuss the world of optical transceivers, which mainly includes the 200G QSFP-DD module. Understanding how this advanced technology increases data center ...

The FiberStamp Technologies 200G QSFP28-DD PSM8 1310nm 10km Optical Transceiver Module is a Eight-Channel, Pluggable, Parallel, Fiber-Optic QSFP DD PSM8 for 2×100 Gigabit Ethernet, ...

GIGALIGHT 200G QSFP-DD PSM8 20km optical transceiver modules are used for medium to long distance interconnections in data centers and are compliant with 100G PSM4 MSA specification and ...
