

The LDX Series of made-in-the-US, high-power, multimode laser diodes provide wavelengths from 400nm - 1900nm, a wide range of output powers and package types, as well as completely ...

The EP780 Discrete-Mode Series laser diode was developed in conjunction with the European Space Agency to serve as a frequency reference for Rubidium-based atomic clocks.

Shop 780nm and 785nm Laser Diodes from ALL TOP BRANDS, Selection Guide for Raman Spectroscopy Lasers

Laser diodes are classified based on continuous operation - Contact us for any special requests regarding classification or power limitation.

PD-LD Inc. offers a variety of packaging options for its" 780nm Series of laser diodes. These units are available in ready-to-use, fiber-coupled packages, including FC, ST, and SC receptacles, as well as ...

Mouser offers inventory, pricing, & datasheets for 780 nm Laser Diodes.

Roithner Lasertechnik GmbH, Wiedner Hauptstra&#223;e 76, A-1040 Vienna, Austria, Tel.: +43 1 586 52 43 - 0, Fax +43 1 586 52 43 - 44

780nm Laser Diodes and semiconductor light sources designed for demanding photonic applications. Innolume delivers full in-house production from epitaxy to packaging, flexible customization and ...

This standardised approach results in no development costs, shortened lead times and reliable laser diode modules in industry standard packages. Our flexible business model allows for customisation ...

ROHM"s 780nm high-speed laser diodes are widely used primarily as light sources for laser printers. They are also ideal for use as a general laser light source in sensor application.
