

# Backup Outgoing Line Cabinet Relay Protection Device

SEL feeder relays enhance distribution system safety and reliability with comprehensive overcurrent, arc-flash, and backup protection. They are designed for utility, industrial, and commercial environments.

By having a backup system in place, problems caused by a protective relay or switching device failing to function are mitigated. Either the primary and secondary safeguards (known as ...

Our devices cover a wide range of applications and offer features such as slim design, embedded cybersecurity and IoT connectivity. Read frequently asked questions about our universal protection ...

High-speed differential protection, automatic controls, and alarms of three-phase busbar or bus systems through to 220 kV. Principal high-speed phase comparison protection of a 110-220 kV ...

The RED650 Intelligent Electronic Device (IED) is designed for protection and monitoring of overhead lines and cables. In addition, RED650 is capable of handling transformer feeders, generator and ...

The Multilin 850 is a cost-effective retrofit solutions where individual components of protection, metering, control switches, annunciator & panel mimic can be replaced by only one relay.

Zone 2 elements of those relays provide backup protection for the failure of the zone 1 elements and provide time-delayed protection of the line section from the end of zone 1 to the end of the line.

Cabinets and devices of relay protection and automation (RPA) manufactured by Radiy are a modern solution for control, automation, protection, monitoring and signaling at power facilities.

This device is suitable for installation in substation switchgear cabinets, providing primary protection for critical feeders, industrial circuits, and ring-main systems.

A fast and selective arc fault mitigation for air-insulated LV & MV switchgear and Relion protection and control relays and sensor technology protect staff and plant facilities for many years.
