

Belgium arbitrarily alters electrical distribution boxes

With a seventh state reform in the pipeline and with all involved endorsing the need for solid reforms, it is time to break the silence and embark on a fundamental debate on power-sharing in Belgium - and ...

Explore an expert guide on distribution law in Belgium, covering agency agreements, duties, compensation, and more. Understand your rights with CMS today!

When the operator of Belgium's electricity transmission grid, i.e., Elia Transmission Belgium, has to reinforce the nation's power grid by building new high-voltage power lines (HV lines) ...

A quick look at key regulatory considerations for electricity distribution and power sales in Belgium.

Nearly all municipalities have transferred responsibility for electricity and gas distribution to inter-municipal companies, which are the distribution system operators (DSOs) for the assigned ...

The general regulation on electrical installations (GREI) is made up of three thematic books. Each book covers an installation level and the associated safety regulatory requirements.

In its landmark decision of 7 April 2023, the Belgian Supreme Court decided that distribution conflicts falling under the scope of the Belgian Distributorship Law are arbitrable.

The dispute concerned the termination of an exclusive distributorship agreement (for a territory including Belgium) between an Austrian manufacturer and a Belgian distributor.

On 7 April 2023, the Belgian Cour de Cassation reversed its long standing case law and decided that (from now on) disputes concerning the termination of exclusive distribution agreements ...

It can therefore be expected that, going forward, Belgian courts will uphold arbitration clauses in exclusive distribution and commercial agency agreements carried out in Belgium, ...
