

Cable tray length is selected based on the load to be supported, the distance between the supports (also referred to as the span), and handling and installation constraints.

Range of Load Tables for Metsec Cable Tray Systems for the mechanical and electrical services industry. For any queries, contact our team on +44 (0)121 6016000.

Steel ladder tray has low thermal expansion (low coefficient) and provides electric shielding for low level control circuits when used in electro-magnetic shielded ladder trays.

This article combines the factors involved in choosing cable tray accessories with load-bearing considerations. It explores how to select appropriate accessories in different environments ...

Eaton offers several options for metallic cable tray including galvanized steel, stainless steel and aluminum. Eaton ladder type cable tray is available in a heavy duty (Series 2, 3, 4 and 5) and a light ...

On average, aluminum cable tray weighs just 60% of its steel equivalent, but it is capable of carrying heavier loads than steel cable tray. Aluminum's light weight significantly reduces the cost of ...

The Ladder Tray features light, rugged, tubular steel construction. It is designed for mechanical support and strain relief in long runs of cable and creates a smooth gradual bend for cable.

Straight sections of solid bottom cable trays constructed from single sheet of metal, providing excellent protection from external damage. They are used primarily for intrumental control, ...

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

Steel Cable Tray Steel Cable Tray systems are Certified CSA Cable Tray, UL listed, and NEMA certified and are available in the following material types 316 Stainless ...

The flexible coupler provides easy installation without measuring and cutting cable tray side rails. Once installed, the coupler allows for electrical continuity, therefore eliminating the requirement for a ...
