

At Nu-Tech, we manufacture a full range of cable entry seals--including single-entry, multi-entry, right-angle, and flanged options--engineered to meet the toughest industry standards. Proudly American ...

our solutions have undergone hundreds of internal and officially registered fire and integrity tests showing their excellent performance and resistance to numerous hazards.

The frame can be opened and closed repeatedly to allow for cable maintenance and additions. The sponge rubber pads are compressed around the penetrating items and can be easily cut to fit around ...

Applications are designed to seal any type of cable penetration, as well as any metallic, composite or plastic pipe penetration. The system can be used for single or multiple pipes, or any combination of ...

Cable tray length is selected based on the load to be supported, the distance between the supports (also referred to as the span), and handling and installation constraints.

Seal cable penetrations with our modular firestop solutions, designed to create water-, smoke- and gas-tight barriers in energy and industry projects both onshore and offshore.

Its innovative two-part design installs easily around non-compliant cable tray penetrations, rapidly restoring fire resistance. Ideal for retrofit environments, the EZ Path Cable Tray Retrofit Device ...

Cable trays provide essential routes for power and data cabling in modern infrastructure. However, when they pass through compartment walls, they can leave large and irregular openings that present ...

Find reliable cable tray sealing systems with firestop testing, IP66 protection, and halogen-free materials. Click to explore top-rated solutions for industrial and commercial projects.

The authors of this paper propose a comparative test method based on an entity test platform for a performance evaluation of cable shaft fireproof sealing systems in high-rise buildings.
