

The Geostationary Environment Monitoring Spectrometer (GEMS), launched by the Republic of Korea in February 2020, enables the hourly monitoring of air pollution levels for almost 20 countries in Asia.

Counted among the top-notch Spectrometer Exporters and Suppliers in Asia, we promise to provide on-time delivery and round-the-clock customer support. Submit your enquiry or call us now to place your ...

VIAVI Solutions is a global leader in communications test and measurement and optical technologies. VIAVI's MicroNIR family of spectrometers is the next generation of ultra-compact near-infrared ...

The PAN is a new network of ground-based remote sensing instruments dedicated to validate the scientific products of GEMS as well as low Earth orbit (LEO) satellites.

Growing preference for multi-element simultaneous analysis and high-throughput spectroscopic detection is accelerating spectrometer adoption across analytical laboratories and ...

A RESTful API allows multiple users to access multiple spectrometers in parallel using simple HTML formats. This driver and web server have been tested on many Linux distributions and ...

Central Asia - Spectrometers and Spectrophotometers - Market Analysis, Forecast, Size, Trends and Insights

CKIC's Online Analyzer is a fully automated multi-element on-line analyzer for bulk materials like coal, ores or other minerals and comprises a sample taking device combined with an XRF-analyzer.

SPECTRO is a global leading supplier of advanced analytical instruments like ICP, Arc Spark OES, and XRF spectrometers for precise elemental analysis of materials.
