

FS 1G CWDM/DWDM SFP hot-swappable optical transceiver operates at DWDM wavelengths from CH17-CH61 and supports high-capacity long-distance network transmission, suitable for Gigabit ...

Features a fully featured FPGA capable of active Layer 2-4 traffic generation and measurement. Ideal for cost- and space-sensitive applications by avoiding usage of additional ...

Learn how to choose the right 1G SFP module for your network. Our guide covers compatibility, distance, fiber type, cost, and vendor selection for optimal performance.

In addition to meeting or exceeding IBTA and IEEE standards, LinkX certified products are 100% tested on Mellanox equipment to ensure optimal signal integrity and the best end-to-end performance.

The transceiver consists of three sections: a CWDM laser transmitter, a APD photodiode integrated with a trans-impedance preamplifier (TIA) and MCU control unit. All modules satisfy class I laser safety ...

Juniper's portfolio of qualified 10G and 1G optical transceivers are low-cost multipurpose modules available in footprint-optimized form factors for deployment across ACX, EX, MX, PTX, and QFX ...

Our 1GB SFP transceivers are 100% compatibility tested in our US based lab, and certified for use with over 90 OEMs including Arista, Cisco, Dell, Intel, Juniper, Mellanox, Nokia. Free evaluations and ...

Arista offers a broad portfolio of high performance optical transceivers and copper cables for datacenter and campus networks, with speeds ranging from 1G to 800G, and reach from 1m to 80km+.

All interface speeds, from 1G to 400GE have connectivity options that include Direct Attach copper Cables (DACs), Active Optical Cables (AOCs), multi-mode fiber and single-mode fiber transceivers.

Our multi-coded transceivers support all major form factors and speeds, including SFP, QSFP, and OSFP, with data rates from 1G to 800G. Ideal for data centers, telecommunications, and more, our ...
