

We manufacture fully customized racks designed to support cold aisle solutions that align with your airflow requirements and energy efficiency goals. With NexGen's precision manufacturing, you'll have ...

Cold Aisle Containment for rack cabinets with single or double sliding doors and sliding roof frame units fabricated out of aluminium, with polycarbonate panel material and fire nozzle entry sections.

Our pre-fabricated solutions are pre-cut and assembled to save time on-site. The system is pre-configured to create hot or cold aisle containment, supported by the cabinet and/or ceiling.

A unique cabinet solution for applications that require engineering services. Our engineering team will work with you to create a cabinet design to meet your requirements for the data center.

Cabinet Supported Cold Aisle Containment (CAC) Solution isolates a room's cold air supply and confines it to an entirely closed off area targeted at cooling IT equipment instead of the room.

A cabinet supported cold aisle containment solution consists of aisle-end doors and roof system to prevent the cold air in aisle mixing with the hot air. With the help of sealing accessories, cooling ...

Keep your server rack aisles cool to prolong network equipment life and data center efficiency. Full scale aisle containment solutions. Modular kits for every edge-of-network application.

Our aisle containment systems are vendor agnostic, featuring innovative, transparent panels that are lightweight and easily attached horizontally or vertically to cabinets using a universal rail system. ...

Find out how to improve your data center infrastructure efficiency, using the cold aisle containment or hot aisle containment solutions from Vertiv.

NDS PATHWAY SUPPORT STRUCTURES FEATURE Integrated Hot or Cold Aisle Containment Systems
Self-supporting floor-mounted design eliminates roof loads Up to 75% cost savings over ...
