

Custom Flame-Retardant and Fireproof Phenolic Resin Cable Trays

Exolit EP 360 (TP) is a low-viscosity, halogen-free flame retardants based on phosphorus chemistry. Both solutions offer a broad resin compatibility, show no sedimentation and address the customer's ...

We offer fire barrier products that include through-penetrations, construction joints, mats, and wraps. With in-person and e-training courses, our system selector tool, and a dedicated team of experts on ...

Find top-rated fire resistant cable trays for sale with customizable options. Compare prices, MOQs, and supplier ratings. Click to explore verified suppliers and get the best deals in 2026.

Use FR Resin to easily 3D print flame retardant, heat-resistant, stiff, and creep-resistant parts that will perform well long-term in indoor and industrial environments with high temperatures or ignition sources.

Bakelite®; phenolic resins deliver lightweight, durable, fire-resistant composites for high-performance applications.

These components offer excellent electrical insulation, high wear resistance, and outstanding mechanical strength. They are ideal for custom-machined parts such as bushings, washers, and ...

Thermosetting resins based on phenol combined with glass fibres or mineral fillers. Ideal for high-temperature applications with stringent fire, smoke, and toxicity requirements.

Our wide offering of concentrates contains elevated loading levels to produce Flame Resistant masterbatches for polyolefins. The latest upgrades to our manufacturing process allow us to produce ...

Discover industry-leading phenolic resin solutions offering superior thermal stability, exceptional fire resistance, and versatile processing capabilities for demanding industrial applications.

This document offers insight into the various types of fire retardant resins and the mechanisms for preventing or slowing down combustion, flame propagation, temperature rise, smoke generation, and ...
