

High power laser diode manufacturing demands stringent contamination control and precise process repeatability. Request detailed information about their fabrication capabilities, ...

AKELA Laser Corporation is a leading high power diode laser manufacturer specializing in custom laser diode products that offer a combination of any wavelengths from 375nm to 2 microns (and above) ...

LaserDiodeSource , part of the Laser Lab Source group, works with industry leading high power laser diode and high power laser control instrument manufacturers to supply Pre-Configured systems ...

CEO's diode engineers are highly experienced in custom designs for specialized pumping and direct diode applications. We can match your specifications to our standard products or design the ...

Leonardo Electronics US, the leader in high-power laser diodes, designs, develops, and manufactures laser diodes for defense and commercial applications.

ISO 9001 & ISO 13485 certified manufacturer of a complete line of high performance diode, DPSS and fiber laser modules and systems. Product lines cover a range of wavelengths from 224nm to 1850nm ...

Whether it is diodes for extremely high reliability applications such as LiDAR pumping or high-power pump modules for industrial and security applications, or customized laser diodes for scientific ...

One size does NOT fit all. With hundreds of products to choose from, one of our standard products may meet your requirement. Alternatively, we can engineer a custom solution quickly and economically.

You are designing a product that incorporates a high power laser diode. The first question to ask is, "Do I need a custom design?" Beyond that, you...

We offer both free-beam designs and fiber-coupled high-power laser diodes. Laser diodes with fiber Bragg gratings are available for use in wavelength stabilization.
