

Custom-made non-standard housing for Mongolian optical modules

If you have specific needs that do not fit our standard packages, we can make modifications to them or even design a custom package for you. We have designed custom solutions for many markets and ...

The housing is designed to enable optical devices used for 100G and 400G applications for long-haul, metro and data center interfaces. A Small Form Factor (SFF) housing footprint compliant to the OIF ...

The choice of optical module is critical, and so is the quality of its housing. We carefully select our products from trusted suppliers who prioritize robust housing design and effective thermal ...

We excel in custom CNC machining services for non-standard hardware parts, including aerospace fasteners, medical device components, and SFP+ optical enclosures.

Syntec Optics is a leading precision optomechanics manufacturer of optical housings for a wide range optical system applications.

This custom optics buying guide provides technical background, comparison of major types, selection criteria, and an overview of suppliers.

Custom precision die cast module bracket made of high-quality zinc alloy. Features tight dimensional tolerance, precise slot geometry, and robust mechanical strength.

These compact housings are empty enclosures that enable the user to create custom electrical circuits, such as filters, voltage dividers, or impedance matchers, as well as fiber modules, such as fused ...

The choice of material and design for this housing directly impacts the module's performance, durability, and suitability for harsh environments. This guide delves into the materials, design considerations, ...

Custom QSFP DD Housings, is a protective casing designed to hold and protect optical modules used in various communication and networking applications.
