

This switch is your next leap forward - a powerful, efficient, and cost-effective way to bring 50G, 200G, and 400G into your rack. Quad-core 2 GHz ARM CPU, dual-redundant power supplies and 4x hot ...

The Accton DCS8500-128D is a high-density, high-performance switch platform for modern data center applications. The switch provides line-rate L2 and L3 switching across its 128 x ...

With 32 x 400GE QSFP-DD ports, the S9300-32D data center switch is where computer resources (servers or blade chassis) are centralized and managed in a structured way utilizing high-efficiency ...

Experience breakthrough switch performance that delivers high capacity, speed, and efficiency. A new modular chassis design supports high-port-density 400G expansion modules. Get a high ...

FS 400G data center switches offer high speeds and port densities to meet the network deployment requirements of various scenarios and the evolving requirements of next-generation data center ...

By delivering authentic and genuine solutions, we have obtained a stable presence as the top HPE Aruba Wireless Distributor, Wholesaler and Stockist In El Salvador.

The SSE-T8196 series presents a diverse range of port speeds and densities, supporting 50G, 100G, 200G, 400G, and 800G, facilitating consistent network architectures that seamlessly scale from ...

With CRS812, 400 Gigabits is no longer out of reach - it's an affordable way to launch your network into the future, while keeping your existing gear in the loop! The device has an operating system ...

It supports various configurations and can be deployed as a spine switch for 100/400 GbE interconnects. The switch comes with the Open Network Install Environment (ONIE), compatible with various ...
