Official FC Barcelona website. All news about the team, ticket sales, member services, supporters club services and information about Barça and the Club

Fibre Channel hardware interconnects storage devices with servers to form the Fibre Channel fabric. The fabric consists of the physical layer, interconnect devices and translation devices.

These modules may have Fibre Channel ports, Ethernet/iSCSI ports, or even NVMe-over-FC support. They ensure high-speed data transmission and redundancy in enterprise storage solutions.

FC physically consists of a minimum of two PN\_Ports, each associated with a Platform, interconnected by a pair of fibres - one outbound and the other inbound at each PN\_Port
