

GLSUN provides a wide range of high-performance Fiber Array components for optical communication modules and photonic packaging. Our portfolio includes single-channel, multi-channel, wavelength ...

Corning fiber array units (FAUs) are engineered for long-haul, metro, and data center applications, delivering ultra-precise fiber alignment with low insertion loss and high optical return loss.

11/65/EU GR-1221-Core GR-1209 Corning OEM offers a broad range of Fiber Array Units (FAUs) for long-haul, metro networks.

PLC Connections offers a broad range of FAUs for PIC (photronics integrated circuit) assembling, including SM, PM, and MFD conversion fiber types. Our FAUs features accurate core position, ...

With large-scale manufacturing and automated assembly capabilities, we support high-precision, high-channel-count, and mass production needs for reliable optical communication system performance.

FAU (Fiber Array Unit) multifiber assemblies offer high-density, high bandwidth solutions for the new era of fiber optic applications, including telecommunications, data centers, silicon photonics, defense and ...

A Fiber Array, commonly abbreviated as FA, is a critical interface component in Silicon Photonics (SiPh) packaging, Photonic Integrated Circuits (PIC), and Co-Packaged Optics (CPO) architectures. It is ...

HYC has a professional FA production process, and the finished product has low insertion loss, high return loss, extremely high temperature resistance and high reliability.

Precision Micro-optics offers high quality fiber arrays which are made of quartz, pyrex or silicon material with flat or angular polished end face. These products feature high pitch accuracy, up to 192 ...

Bynet MT/FA components enable low-loss, high-density connections for data centers, 5G & transceivers. Features precise V-groove alignment, 0°/8°/45° polish, and SM/MM/PM fiber support.
