

The ASP 4601 Fiber Clamp is a compact, single fiber, point-of-use fiber clamp designed to be easily integrated into new or existing systems where size, repeatability and reliability are a concern.

Charles Fiber Flexibility Pedestals (CFFP) offer a scalable, low cost alternative to placing traditional cabinet-type centralized split points (also known as fiber ...

Our male-to-female buildout optical attenuation (Pads) are available across all fiber modes, featuring LC, LC/APC, SC, SC/APC, FC, FC/APC, and ST connector types. Our in-line attenuator is customized to ...

The FieldSmart [®] Fiber Delivery Point (FDP) Pedestal Insert product line incorporates the delivery of fiber connectivity to the neighborhood or business district in the most cost-effective footprint possible.

Fiber Pad offers a wide range of thermoforming capabilities for your specific needs. Click below to learn more about the different types of thermoforming options we offer.

CommScope designs and manufactures a variety of Fiber Cable Clamps and Grounding Kits

Molding a product with the requisite filler agent offers a composite material close to that of the fiber itself and ensures controlled rates of expansion and contraction relative to the fiber and thus, the ability to ...

Easy assembly and disassembly thanks to the insertion aid Smooth clamping of sensitive fibre optic cables due to the soft EPDM material The slotted holes allow the insertion of pre-assembled fiber ...

FIBERLAST[®] is an advanced material made from elastomer and unused synthetic fabric fibers, cured in a cross layered manner to yield an omni-directional random oriented fiber (ROF) bearing pad.

Fiber optic cable clamps are devices used to secure and stabilize fiber optic cables in a wide range of applications, including telecommunications, data centers, and network systems.

Secure aerial networks with a Fiber Optic Tension Clamp. Discover types, selection, and installation to prevent sag and protect cables.
