

Fiber heads optimized for special tasks such as wafer mapping, hot reflective surface detection, etc. Ideal for color mark detection. Omron's high-performance fiber optic sensors and amplifiers come in ...

Amplifier Units, simple operation and high performance, can select various Fiber Units depending on works and space.

With a wide range of over 400 fiber optic heads and models that include high-performance, advanced, standard, and cost-effective options, these amplifiers meet diverse ...

Browse high-temperature and high-flex fibers for use with the OCF fiber optic amplifier.

The BF3 series fiber optic amplifiers come equipped with dual adjusters (COARSE, FINE) for precise sensitivity adjustment. The units feature high-speed response time under 1 ms, and users can ...

This is a series of fiber optic sensor heads designed to be connected to a fiber optic sensor amplifier. The FU Series offers a wide variety of options including thru-beam, reflective, retro-reflective and ...

Designed to amplify and process light signals from fiber optic cables, these devices are ideal for detecting small objects, precise positioning, or monitoring processes in challenging environments.

From high-quality fiber-optic amplifiers to rugged optical fiber cables and matching accessories. In combination, these perfectly matched components enable high efficiency and precision in demanding ...

Fiber optic sensors are small enough to fit in confined areas and can be positioned precisely where needed with flexible fibers.

Sleeve Fiber Ultra-small diameter fibers with a compact head ensure precision centering accuracy to stably detect minute parts.
