

Fiber blowers and cable blowing machines are used to install fiber optic cables through conduits using controlled air pressure. This method ensures smooth cable placement, minimizing friction and ...

Robust and powerful, pneumatic operated fiber blowing machine designed for single cables and for relining of multiple micro ducts. Configuration can be made for cable between 4 and 40 mm and ...

Condux Gulfstream 350 Fiber Optic Cable Blower is all pneumatic and comes complete with a convenient storage case. The Air Compressor is designed specifically for use with our Micro Fiber ...

Safe, strong, smart: AIRJET blowing machines for fibre optic cables for all network levels

Air blown fiber systems use air to blow micro optical fiber cables through pre-installed microducts. Air blowing fiber, also known as jetting fiber, is an efficient way to install fiber optic cable and facilitates ...

Its sophisticated fiber protection is designed to ensure that the blown fiber's mechanical and optical integrity is maintained. The machine is self-contained and only requires a single electrical supply and ...

International distributor for fiber optic components, equipment and accessories while providing invaluable technical consultation and support.

Using quality blowers will allow for the installation of fiber optic cable quickly and easily. The blowers have become a very efficient method of installing cable. Some of the companies that are ...

Sumitomo Electric Lightwave's cable blowing head is used to blow the compact fiber optic bundles through the tube cable on a stream of air or nitrogen gas. Installation is completely stress-free, ...

Years of cable installation experience has gone into the design manufacture of Condux fiber optic cable blowers. From long haul to fiber-to-the-home, Condux blowers are miles ahead.
