

Cable reels with motor drives are used as a power supply for mobile consumers for automated winding of flexible power or control cables for the following areas:

Cables are preinstalled onto the reel assembly which includes integrated cable e downs and a carry handle for easy transport. The reel provides proper support, and allows for easy retrieval and storage.

DVANCED REEL SYSTEM (MARS Overview OCC is pleased to introduce the Modular Advanced Reel System (MARS&#174;), the industry"s first lightweight cable deployment reel system designed specifically ...

The FCR-1000 series cable reels are designed to fit Princetel"s standard FORJs and slip rings. The rotary joints are protected inside the drum for durability and seamless deployment of single or multi ...

This Reference Manual spotlights the OPGW installation instructions required in the field. ZION offers detailed installation instructions on the proper techniques for installing OPGW cables.

The reel"s structural components consist of two flanges, central drum, flange bolts, SmartReel™ test connector and horizontal wood slats (Figure 1) that keep the reel in alignment and ...

3.40. Upon arrival at the job site, remove the packaging from each cable reel and remove the cable data sheet, if present, which documents individual fiber specifications for that particular reel.

Aerial optical cable is suspended in the air from poles and/or support structures. Most often it is supported between poles by being lashed to a wire rope messenger strand with a small gauge wire.

Unlike traditional metal-style reels, MARS is a lightweight, modular system constructed of an impact modified polymer that is easily transported. It is ideal for ...

The stationary reel method leaves the reel in place and the cable is pulled along the route and temporarily attached to the messenger with cable blocks. After the cable is placed, the lasher is ...

Using this method, the fiber optic cable is pulled into place beneath the strand using cable blocks. Lashing the cable to the strand then begins at the far end of the cable route with the lasher being ...
