

Shop fiber light meters with precision measurement capabilities. Find portable testers for network installation and maintenance work.

Testing fiber optic components and cable plants requires making several measurements with the most common measurement parameters listed in the Table below.

Ideal for fiber optic testing, this meter offers 8 wavelength measurements and a built-in visual fault locator, ensuring precise and efficient testing. Ideal for verifying fiber activity and polarity, this pocket ...

Tier-1 certification kit with power meter and light source, compatible with multiple duplex and multi-fiber connectors up to 24 fibers. Measures loss, length, and polarity in just 1 second, as per certification ...

When placing tones on the fiber using a Tempo Communications source, the optical power meter will definitively identify fiber optic cables. The rugged, IP54-compliant package provides confidence when ...

Explore precision Fluke Networks fiber optic power meters and fault locators for accurate testing and diagnostics of fiber networks.

OWL's complete line of fiber optic testers have capabilities ranging from simple optical power and optical loss measurement to complete standards-based fiber optic link certification for both multimode and ...

The WaveTester optical power meter is multimode and singlemode ready, and can store reference values for all wavelengths used for optical loss measurements. Up to 200 fiber runs may be stored, ...

All-in-one unit with easy-to-read LCD interface tests fiber optic cables for breaks, insertion loss and optical power loss. Essential for cable installers or anyone in telecom or LAN environments.

The WaveTester is one of the world's most economical and accurate fiber optic link certification power meters delivering professional performance and a complete feature set for optical loss testing in both ...
