

Shop DigiKey's large in-stock selection of Fiber Optic Switches, Multiplexers, Demultiplexers. View inventory, pricing and order now for same day shipping!

It works best with Fibertronics Cat6 or Cat 5e Ethernet patch cables. It supports dual optical fiber, with a 100Base-T maximum transmission distance of 2km. It is an ...

GAOTek ring network switch adopts industrial rail design, 16 GE + 4 OPTIC network switch is a new generation of multi-service access network management Gigabit redundant Ethernet switch, with ...

The RLH Industrial Managed Ethernet Switch offers 4 Gigabit SFP slots, 8 RJ-45 Fast Ethernet Ports, and 16 100Base-FX fiber ports. The high fiber port count makes this a great switch for aggregating ...

Designed for labs, data centers, and high-performance networks, this switch allows a single fiber connection to access any of four separate fiber paths (A, B, C, D) without reconnecting cables.

Up to 120km : Fiber transceiver provides multiple Gigabit SFP ...

It works best with Fibertronics Cat6 or Cat 5e Ethernet patch cables. It supports dual optical fiber, with a 100Base-T maximum transmission distance of 2km. It is an ideal for commercial office applications, ...

The switch provides 2 Gigabit SFP optic ports, 4 Fast Ethernet ports, and 4 RS232/422/485 serial ports. This switch adopts an industrial redundant ring network design, where each device has two fiber ...

The workshop deploys two independent fiber optic ring networks (Ring A and Ring B), each containing eight USR-ISG-8G industrial switches interconnected over 10 kilometers using 10G single-mode ...

Learn how to design a fiber optic ring network with practical diagrams, topologies, and switch setup tips. Explore ring network switch options for industrial applications.

Up to 120km : Fiber transceiver provides multiple Gigabit SFP optical ports and 10/100/1000M adaptive RJ45 network ports, users can choose different SFP optical modules ...

A fiber optic ring is a network topology where fiber optic cables form a loop or ring. Each node (switch, router, or other network devices) is connected to two other nodes, forming a closed-loop structure.
