

Customized and flexible laminated busbars Isoflexx® can be used for all electrical connections in low-voltage installations.

Whether it's for an industrial and military equipment, a renewable energy or for transportation, our insulated and laminated busbars integrate intelligently into your various projects with a multitude of ...

Mechanical Characteristics, PI Cu-ETP according to UNI 3310-72. Cu-ETP 5649-71 corresponds to the following specifications: VSM 10826.

Lightweight, easy to machine, and corrosion resistant--all with material certificates for traceability. Choose from our selection of bus bars, including over 650 products in a wide range of styles and ...

100% tested, mechanical fixing, heat stacking, screwed, no partial discharges. LOW INDUCTIVE BUSBARS. Low inductive, DC link, capacitor bank.

Our busbars can be combined with fasteners of all shapes and sizes but when combined with our HPLB (High-Power Lock Box) terminal we can eliminate all loose fasteners and provide a self-aligning, ...

Discover our automotive busbars and terminal blocks to consolidate wiring and distribute power in a cost-effective manner. Screw and stud terminals available.

Mersen's industrial bus bar design solutions extend over half a century, delivering the ultimate in optimized, laminated bus bars to countless manufacturers of motor drives, fork lift trucks, welding ...

Thanks to the flexibility of our busbars, it is possible to use one busbar model for different installation dimensions and to mount it in different applications.

RiLine busbar systems for individual switchgear and controlgear. Complete solutions up to 1600 A for AC or DC applications. 3-pole, tool-free mounting, short circuit-resistant up to 65 kA, fully contact ...
