

High and Low Voltage Complete Sets of Equipment in Brazil

The company specializes in electrical installations, maintenance, and projects, offering expertise in industrial automation and systems such as lighting, grounding, and low to medium voltage cabling.

Brazil Electric Power Transmission & Distribution Equipment Market is expected to grow during 2025-2031

As a hundred percent domestic company, ITB Equipamentos Eletricos started its activities in 1974, with production limited to 240 transformers per year and sales restricted the interior regions of Brazil.

The analysis is structured to be adaptable to any Brazil High Voltage Equipment Market while providing actionable, region-specific insights.

From November 21 to 23, 2023, a delegation from the Izolyator Group visited enterprises producing power equipment in Brazil.

The study includes the market size and forecast for the electric transmission and distribution equipment market in Brazil by product type, voltage, and end use industry as follows:

We have a full line of forged steel and aluminum fittings as well as polymeric materials for all voltage classes from distribution networks to extra high voltage.

44 comprehensive market analysis studies and research reports on the Brazil Power Transmission and Distribution sector, offering an overview with historical data since 2019 and forecasts up to 2030.
