

High-precision PoE switches for data centers

Offering high-speed connectivity from 2.5G up to 25G Ethernet, these switches deliver both power and data over a single Ethernet cable--ideal for devices like Wi-Fi access points, high-resolution IP ...

Functions supported: 1. Display the port rate. 2. Display the port bandwidth utilization rate. 3. Display the PoE power usage. 4. Display topology information. 5. Display the alarm status. 6. Restart ports and ...

Optimize data centers with PoE (Power over Ethernet). Efficient solutions to reduce costs, enhance scalability, and future-proof your infrastructure.

Our IEEE-compliant PoE devices simplify router and switch design, reduce bill of materials and speed time-to-market for adding the latest 90 W PoE standard.

Whether you need unmanaged switches for simple plug-and-play connectivity or managed switches for advanced network control, Eaton has you covered. These switches offer robust features like Gigabit ...

Data Centers Reliable networking infrastructure with high-speed fiber connectivity and optimized data transmission for modern data centers.

Campus, branch, and data center HPE Aruba Networking CX Switch Series Secure-by-design. AI-native. Cloud-native. Modernize switches in your campus, data center, and branch networks with the ...

The unmanaged PoE switches of the 1000 series enable you to supply up to eight terminal devices with power and data via the same Ethernet cable.

This data sheet describes the benefits, specifications, and ordering information for the Cisco Catalyst 9200 Series Switches.

We provide a wide range of PoE/PoE+/PoE++ switches with up to 90 W output per port to deliver high-speed data transmission while powering high-power devices over long distances. With an industrial ...
