

# How to connect fiber optic cables to an optical splitter

Optical coupler and splitter guide: split or combine fiber signals, choose the right device, and optimize your fiber network for reliable performance.

If you have fiber optic cable inside your home, it is possible to install a cable into the home input then split the signal so you can connect the signal to two different television hookups.

To prove the splitter sends the same signals out of each of the outputs, change your connection on the 4 fiber side to the other fiber outputs of the splitter and confirm the link still works.

In this guide, we'll explain how to safely connect a splitter to another splitter, covering both fiber optic and coaxial setups.

Connect The version/tag is PAAM\_B\_20241205\_4006

This post provides a introduction to how does a fiber optic splitter work, and optical fiber splitter application in FTTH.
