

How to connect the AP panel to the fiber optic cable

Learn how to use fiber optic cables to connect access points and achieve extended, reliable Wi-Fi coverage. In this video, we'll walk you through the entire process, from understanding...

Route the pigtail of the hybrid cable 2.0 through the hole in the upper right corner of the fiber management tray, and connect the pigtail to the AP through the hybrid module.

Master how to connect fiber optic cable with our detailed guide. Step-by-step instructions to ensure you achieve the best performance and reliability in your setup.

In this video. You will see how to re-use the existing fiber optical cable to add a new WiFi access point. The BiDi transceiver allows a single fiber optical cable to transmit and...

This section describes how to connect the AP to a controller. For instructions on how to configure the AP, see the relevant release's Cisco Wireless Controller Configuration Guide.

Before connecting an Ethernet cable to the AP, use the cable test tool to check whether the cable is qualified. If not, replace it. Install an optical module on the SFP+ port and connect it to the ...

Fiber optic cables can transmit data over longer distances without loss of signal quality, making them ideal for installing Wi-Fi 7 APs across large areas like campuses or office buildings.

You can connect the fiber-optic networking cable to the SFP port (labeled "4" on the base of the AP). The small form-factor pluggable (SFP) transceiver module is used to connect the cable to the SFP port.

Ethernet Cable and M20 Cable Gland Installed to AP Figure 9 Connecting the Fiber-optic Cable The fiber-optic cable is not included in the package and must be purchased separately. Purchase a ...

The optional Cisco accessory fiber-optic kit enables the AP to support fiber-optic network connections. You can connect the fiber-optic networking cable to the SFP port.
