

How to perform phase modulation only with a spatial light modulator

Our work presents zero-static power transmissive phase-only SLMs, enabled by electrically controlled low-loss PCMs and individual meta-molecule ...

Correction is achieved using two spatial light modulators in series--the first performs amplitude modulation, while the second compensates for phase distortion, ensuring consistent optical elements ...

For practical purposes, we have developed a nonpixelized, electrically addressed spatial light modulator such as electron beam addressed spatial light modulator (EBSLM) and LCD coupled PAL-SLM. We ...

A compact and flexible optical setup for phase-only spatial light modulator calibration is developed.

Our work presents zero-static power transmissive phase-only SLMs, enabled by electrically controlled low-loss PCMs and individual meta-molecule addressable metasurfaces.

We show how to encode the complex field of laser beams by using a single phase element. A common-path interferometer is employed to mix the ...

In this paper, we propose an alternative simple method to arbitrarily manipulate the amplitude and phase of the incoming light beam with two phase-only SLMs without using any phase...

In this work we test a new type of SLM, known as a phase-only light modulator (PLM), that blends the high efficiency of liquid crystal SLMs with the fast switching rates of binary digital micro ...

Finally, we demonstrate the device's functionality as a fully configurable spatial light modulator by independently control-ling each meta-molecule to locally impart phase shifts and to manipulate the ...

We show how to encode the complex field of laser beams by using a single phase element. A common-path interferometer is employed to mix the phase information displayed into a ...

In practice, our calibration method works well with as few as 18 interferograms, which can be quickly acquired without concern for phase drift. We detail the calibration procedure and ...

An OASLM with parallel-aligned liquid-crystal light valves (LCLVs) works in phase-only mode and the influence of driving conditions on the phase-modulation capability of the OASLM is ...

How to perform phase modulation only with a spatial light modulator
