

# Intelligent Integrated Relay Protection Specifications

This specification defines the Requirements for the Intelligent Motor Protection Relay performing Metering, Monitoring and Motor Protection functions, associated with User Interface and ...

It offers real time data processing and high precision. It may be applied to the secondary inverter control circuit with its outstanding resistance to harmonic noise. Permissible frequency range is 10~200Hz. ...

The EMPR is a digital intelligent motor protection relay with an onboard MCU (Microprocessor Control Unit) and guarantees high reliability with real-time data processing, superb precision and antisurge ...

The Ampcontrol IPC Integrated Protection Relay is an intelligent protection relay based on microprocessor technology. The integrated relay provides the necessary functions required for ...

iRelay 60 is CET's elaborately designed multifunction protection relay for LV, MV and HV power systems as it features high-performance hardware design equipped with 32-bit Dual-Core CPU, 64-bit DSP ...

The IPM Integrated Relay provides the necessary functions required for protecting electrical outlets supplying underground mining machinery, powered by reeling or trailing cables, in the metalliferous ...

This document provides information about intelligent digital motor protection relays, including their product characteristics, standard models, rated specifications, protection functions, communication ...

iRelay 60-E Intelligent Protection Relay The iRelay 60-E is an advanced intelligent protection relay that integrates protection, control, measurement, supervision and automation functions into a single ...

Test high burden electromechanical relays, 6x10A continuously outputs. Provide convenient and prompt precision calibration for amplitude and phase by software without open the cabinet. Advantage All-in ...

The IPD Integrated Protection Relay is approved for use in mining operations. For the protection of mining equipment in hazardous areas the relay is installed in a flameproof enclosure with the Remote ...
