

Many are controlled via a fiber-optic cable that unspools as the UAV travels up to 20 kilometers from the operator, making them impervious to Israeli electronic warfare countermeasures.

All the information, articles, latest news and analysis on Fiber-optic on ynetglobal.

Israel's tech leap risks leaving its most vulnerable offline--Haredi, elderly, poor--right as war demands connection. Cellular giants chase profits, but the clock's ticking to avert a blackout.

Prior to the establishment of Yes there were only three other cable companies in Israel: Tevel, Matav and Arutzay Zahav. The competition with Yes caused a big loss of members amongst the cable TV ...

So far, over 90% of households in Israel have access to fiber optic infrastructure. The fiber optic infrastructure map that was launched today, is in addition to the map that reflects the cellular antenna ...

Four projects meant to connect Europe and Asia via Israel are being hampered by both external and local obstacles.

On Thursday, Israeli forces severed fixed communication lines and internet services in central and southern Gaza, just two days after cutting them off in Gaza City and the northern part of ...

Despite being buried deep in trenches on the seabed, these fiber optic cables became unintended casualties of Israel's regional war and the struggle for Palestinian liberation.

Several officers are working under the general to find solutions for first-person view (FPV) drones, especially those guided by fiber-optic cables, which are immune to electronic jamming and ...

Gaza experienced a complete internet and communication blackout after Israel struck its last fiber optic cable, cutting off all internet and fixed-line services. The Palestinian Authority blames ...
