

Alpha Networks addresses this challenge with its liquid-cooled 1.6T switch, delivering superior thermal performance in a more compact form factor. This not only enhances data center ...

The MV-CHA1600NV is a retimer device which utilizes a 200 Gbps PAM4 DSP SerDes. There are eight 200 Gbps SerDes lanes to the host device and eight 200 Gbps SerDes lanes to the copper cable to ...

The DS6001 is a 2OU, 64-port x 1.6TbE switch offering a hybrid cooled solution based on the 21-inch OCP ORv3 rack. Both switches are based on the new Broadcom Tomahawk 6 (TH6) ...

Alpha Networks Inc. (3380), the leading supplier of network communication solutions, announced today (9/22) the launch of its newly developed 1.6T liquid-cooled switch equipped with ...

A comprehensive technical examination of co-packaged optics (CPO): how electrical bandwidth limits drive integration onto the switch ASIC package, silicon photonics modulator ...

Celestica DS6001 is a next-generation ultra-high-density 1.6T OSFP224 switch developed for advanced data center and AI infrastructures that require extreme bandwidth, efficient scaling, and high ...

Since 2001, Diginet Jamaica has delivered quality I.T. Infrastructure and Networking solutions to the Jamaican market. Diginet Jamaica provides products for wiring and communication applications such ...

Celestica has introduced two new 1.6TbE data center switches--the DS6000 and DS6001--designed for AI and machine learning workloads requiring extreme bandwidth and flexibility.

Celestica Inc., a key provider in design, manufacturing, supply chain and platform solutions for the world's most innovative companies, introduced two new 1.6TbE data center ...

Featuring state-of-the-art Broadcom chipsets, these switches offer capacities ranging from 200G to 1.6T. Integrated into GIGAPOD cluster computing platforms, the joint display highlights ...
