

An LED module is a nifty gadget designed to be self-contained to function independently or to be added to a complimentary unit. It is made of parts constructed to produce light from a light emitting diode ...

The optical lens on each LED module controls how light spreads. Instead of emitting harsh, concentrated light points, the lens diffuses and distributes light more evenly, reducing hot spots and ...

A Retrofit LED Light Module / LED light engine - is a complete lighting module designed to simplify the integration of LED technology into various applications and allow you to convert your existing light ...

Vertically integrated LED modules. Samsung LEDs full coverage from chip manufacturing to module assembly allows easy and fast distribution of new technology to every product line.

[Quick view Constant Voltage COB LED Module 12V 3W 6000K \(Cool White\)](#) [Quick view Constant Voltage COB LED Module 12V 3W 5000K \(Daylight\)](#) [Quick view Constant Voltage COB LED Module ...](#)

Discover a wide range of LED modules for signs, advertising, and decorative lighting. Find waterproof options in various colors and brightness levels.

Constant current LED modules designed for strip, troffer, downlight, and custom fixture applications, delivering reliable performance and versatility for various lighting needs.

An LED light module, or light emitting diode module, is an LED device that is made to either function alone or that is pluggable into a compatible unit for power up.

DIY light based transmission between two Arduinos using LED and LDR with custom communication protocol.

LED Modules The advent of LEDs in the lighting industry has created unlimited freedom in light source design, thus enabling luminaires that have been unthinkable before. With our comprehensive ...
