

When installing a safety light curtain or other electrical detection protective device, refer to the minimum required distances for stopping the machine prior to the body reaching the hazardous zone when the ...

Choose from our selection of safety light curtains, including light beam safety barrier switches, safety relays, and more. Same and Next Day Delivery.

Self-contained, high performance measuring light curtains available in lengths from 300 to 1980 mm. Sensing range of up to 10 metres. Sturdy aluminium, IP67 profile.

Learn how measuring light curtains (like ESPE) scan objects for size/defect detection, center positioning & more. Includes key precautions for accurate industrial measurements.

Explore ifm light curtains for measuring object shape, size, location, and orientation using the same technology as a safety light curtain.

A safety light curtain is a highly developed electronic protective device. Its detection capability is based on precise sensor technology: the closer the light beams are to each other, the smaller the objects ...

Describes how to test the performance of light curtains, covering equipment, procedures, compliance standards, and troubleshooting tips.

Measuring light curtains from di-soric are used wherever information is required on the presence of passing parts and information on size or position. The evaluation electronics depends on the model ...

These devices are perfect for measuring moving objects as they pass by. The measurement results can be output via the fully integrated interface. At the same time, the programmable switching outputs ...

Excels at high-speed, precise monitoring and inspection applications, including on-the-fly sizing, profiling, edge guiding, and hole detection.
