

SENKO's Compact Coarse Wavelength Division Multiplexer (CWDM) is based on Thin-Film-Filter and Micro-Optics, this product features small form, ultra low loss and high channel isolation.

ARIA WDMs are manufactured using a proprietary optical bench platform which significantly improves optical performance and reduces manufacturing cost. These modules are highly customizable and ...

Optiworks" ultra compact CWDM-DWDM is based on free space TFF technology with ultra low insertion loss, which has granted and published patent. The device with good performance could meet the ...

Compact CWDM modules manufactured by Takfly are a mini-wavelength division multiplexer with small size, lower insertion loss and better consistency.

The compact CWDM modules (CCWDM, compact coarse wavelength division multiplexers) from Lfiber are the perfect means for adding capacity to your fiber ...

This compact module features low insertion loss, high channel isolation, and excellent stability, making it ideal for telecom networks, data center interconnects (DCI), 5G transport networks, and fiber access ...

This compact cwdm module is a kind of wavelength division multiplexing technology based on TFF (Thin Film Filter). It is designed for cost-effective CWDM network application.

Future Optics" miniature style housing CWDM is the smallest in its class, a new 8 CH UC-CWDM device measures 21mm long by 15.5mm wide by 5.95 mm thick. This makes it ideal for closely spaced ...

The compact CWDM modules (CCWDM, compact coarse wavelength division multiplexers) from Lfiber are the perfect means for adding capacity to your fiber optic network without installing additional fiber.

This compact cwdm module is a kind of wavelength division multiplexing technology based on TFF (Thin Film Filter). It is designed for cost-effective CWDM network ...

The FRM220-CWMD81B-2961 is an 8-channel CWDM/DWDM optical transceiver module with LC/UPC connectors, low insertion loss, and a monitor port, ideal for high-capacity, long-distance fiber optic ...

Our high isolation, low PDL CCWDMs offer high quality parameters up to 18 channel solutions and can include a 1310nm upgrade port and test/monitor ports as well.
