

Low-loss installation solution for PDUs in Belarusian data centers

Increasing rack power density both in the data center and at the network edge means that reliable power distribution is crucial. Our innovative power distribution units and rack PDUs not only maintain power, ...

Modern PDUs support single-phase or three-phase power, with the latter offering more efficient distribution by reducing heat and enabling balanced loads across phases.

Data center PDUs distribute power from UPS or utility-backed systems to rack equipment. This guide explains PDU types, key features, deployment styles, and how to choose the ...

From the physical installation steps to configuring PDUs for specific needs and customizing them to meet network requirements, every aspect contributes to ...

Rittal provides reliable PDU and UPS solutions for IT enclosures housing servers and networking equipment to optimize performance and prevent data loss.

Learn how to choose the right power distribution unit (PDU) for your data center IT enclosure -- from types and specs to monitoring, scalability, and best practices.

Data center managers are faced with increasingly challenging demands: supplying additional computing power using less energy in a smaller space, while staying within budget constraints and maintaining ...

Enterprises commonly connect PDUs to DCIM systems using Ethernet and SNMP. This provides basic visibility into PDU status and may allow for software updates. However, few organizations leverage a ...

See the features and compare the specs of our PDU families to find the perfect PDU to meet your demanding applications.

Ready to Optimize Your Data Center? See how Ethernetics can unlock stranded capacity and reduce your operational costs. Book a personalized demo with our team.

Modern PDUs help minimize power loss through intelligent load balancing and high-efficiency components. Many advanced PDUs achieve 95% or higher efficiency ratings, directly impacting ...

Plug-and-play PDUs quickens installation time and data hall refreshes. Adopting pre-assembled, locally-sourced PDUs reduces lead time from months to weeks. Increase connection security in harsh and ...
