

PAM4 effectively doubles the data rate for a link bandwidth at the expense of reduced signal to noise ratio (SNR). PAM4 is used in 400GE, 800GE, and 1.6T Ethernet as well as PCIe 6.0 and other ...

Learn how to measure PAM4 signals for high-speed digital networking applications.

This presentation will provide information on a 4x112Gbps PAM4 (400GBASE-FR4) approach and investigation results to support the technical feasibility of the 2km objective based upon current ...

Understand PAM4 signaling basics and how it differs from NRZ. Expert insights on testing challenges, eye diagrams, and validation for 400G/800G Ethernet.

However, PAM4 provides faster signaling rates without significantly increasing design challenges. For a given speed, it has only half the Nyquist frequency of NRZ - 14GHz compared to 28GHz. Therefore, ...

By leveraging PAM4, the module effectively doubles the bit rate compared to traditional NRZ-based solutions, making it ideal for cost-effective, high-performance, and long-distance optical ...

Power and area efficiency is critical in these use cases. The Cadence 112G-VSR PAM4 SerDes PHY provides optimized power, performance, and area (PPA) for short-reach to medium-reach ...

In this blog, we take a higher-level look at PAM4, the modulation scheme that makes short distance 400G networking possible, and discuss how this technology has enabled big leaps in optical ...

The latest OTN client-side series transceivers can support both Ethernet and OTN transmission. It features PAM4 higher order modulation technology to transmit 100G over a single wavelength by ...

LOWELL, MA - March 17, 2026 - MACOM Technology Solutions Inc. ("MACOM"), a leading supplier of semiconductor products, today announced the availability of its new 448G PAM4 modulator drivers, ...
