

Method for manufacturing pigtail hot melt tubing

Tef Cap Industries, a trusted PFA tubing manufacturer, makes a wide range of tubing solutions for a wide spectrum of industries, from medical and aerospace to industrial and more. Our fluoropolymer ...

In the first case, the hot billet is processed by punching, hot rolling and stretch-reducing rolling into a seamless tube. In the second case, the hot billet is shaped into a plate or a strip by hot and cold ...

We have over 70 years of experience producing high quality tubing and always provide our customers with first-class products. Watch our video to meet members of our team and learn more about the ...

PURPOSE:To improve forming accuracy and to obtain a uniform product by fixing the position where the forming of a coil spring is to be started, winding the open end thereof to a core jig for...

Rotary piercing is a hot working metalworking process for forming thick-walled seamless tubing. There are two types: the Mannesmann process, invented in the 1880s, and the Stiefel process, developed ...

We are experts in the development, production and processing of seamless precision steel tubes. High pressure resistance, strong load capacity, uniform shape: The advantages of seamless tubes are ...

Our solutions are widely applied in catheter and guidewire manufacturing, supporting a wide range of critical medical applications. They are designed to improve production efficiency, ensure consistency, ...

Step-by-step overview of Nitinol Tubing processing equipment, from alloy melting to finishing, ensuring precision and quality for critical applications.

Comprehensive guide to steel tube manufacturing, including seamless and welded processes, pilger rolling, and extrusion techniques.

Production of Seamless Steel PipesProduction of Welded Steel PipesTube DrawingFinishingLiteratureTube drawing is used to resize large diameter tubes into smaller ones. It is performed at room temperature by pulling the tube through a die. In some instances, the required size may not be obtained directly from the rolling mill, therefore cold drawing can be used. In this process, the tubes or pipes are coated with an oxalic and soap solution to ...See more on expometals .b_imgcap_alttitle p strong,.b_imgcap_alttitle .b_factrow strong{color:#767676}#b_results
