

These were extremely heavily loaded rod hanger supported cable tray systems (over 1 foot of cable on the tray). The rods were threaded into cast-iron sleeve anchors embedded in the concrete ceiling.

Widely used in electric, automobiles and construction industries; our Hot Dip Galvanized Cable Trays are sure appreciated by customers for its robust construction and capacity to withstand adverse ...

We, one of the well-known Cable Trays Manufacturers in Namibia, offer top-notch trays that keep your electrical system organized and protected. Our durable, high-quality trays come in various sizes and ...

The seismic performance levels of cable tray systems are presented according to current seismic design codes. A performance-based optimum seismic design procedure for cable tray ...

Leading GI Cable Tray Manufacturers in Namibia: Delivering Precision and Quality Looking to buy a GI Cable Tray in Namibia? Jeetmull Jaichandlall (P) Ltd. is one of the trustworthy GI Cable Tray ...

We offer a pre-engineered, time-saving solution which braces and secures non-structural equipment within a building to minimize damage from earthquakes or seismic events.

This article discusses the importance of seismic resistance for cable trays, detailing when seismic braces are necessary, the factors that affect seismic resistance, and how to ensure your ...

Cable trays are systems used for the safe transportation and protection of electrical cables, designed to fit the pathways within buildings and structural installations.

As with cable restraints, floor- or roof-mounted electrical distribution support systems will normally involve a box frame that supports the system (single or multiple runs) with some kind of a trapeze bar.

Our team of experts can help you select the best cable tray series for your application, as well as designing your seismic bracing layout to ensure it meets applicable building codes and standards.
