

You should be able to charge your phone without a travel adapter in Namibia. However, it's always a good idea to check the specifications on your device's charger to confirm compatibility, or consider ...

North Americans will need an adapter for the outlets and a transformer for the voltage when traveling to Namibia. North Americans device plugs will not work with the outlet types in Namibia.

Namibia uses two different plug types: D and M. Plug type D is a three-pin plug with two round pins and a large, round earth pin. Plug type M is a three-pin plug with two round pins and a smaller, ...

In Namibia, power plugs and sockets (outlets) of type D and type M are used. The standard voltage is 220 V at a frequency of 50 Hz. For more information, select the country you live in at the top of this ...

Can anyone who has travelled throughout Namibia and stayed in a variety of places (campsites, AirBnBs, hotels) confirm what kind of plug adapter is required? Some websites suggest it's Type M ...

Namibia uses Type D and Type M outlets at 230V/50Hz, the large round-pin South African standard. These are bigger than the plugs used in most of the world, and virtually no universal adapter covers ...

Namibia uses Type D, Type M power plugs, electrical outlets and wall sockets at 220V, 50Hz. Check if you need a travel adapter or voltage converter for your trip to Namibia.

Because of the strong trade ties between Namibia and South Africa, type N sockets have also started to appear in Namibia and can be found almost all newly constructed or renovated buildings.

Namibia travel adapter guide. Learn which plug types are used in Namibia, including Type C, Type D, and Type M.

Namibia uses electrical outlets and power plugs of types D & M (see images). If your country uses the same electrical outlets and power plugs, you don't need a travel adapter.
