

Durable Optical Cable Vibration Damper company offers high-quality, reliable dampers to protect fiber optic cables from vibration damage

The VORTX Vibration Damper responds to wind-induced line vibration that is characterized by high-frequency, low-amplitude motion commonly known as aeolian vibration.

This damper is especially designed for installation with ADSS fibre optic cables, improving the performance of the conventional stockbridge vibration damper when used with this kind of cables.

Vibration Dampers work to cancel damaging fatigue caused by wind-induced vibration. Most tuned damping devices operate best near their natural frequencies.

The Hubbell spiral vibration damper (SVD) reduces Aeolian vibration on ADSS cable, Conductor, and Shield Wire/OPGW. Aeolian vibration is a high frequency, low amplitude caused by wind passing ...

Spiral Vibration Damper is made of high-strength, antigenic and high-elasticity PVC plastic, easy to be installed on ADSS cables and OPGW cables which diameter are smaller than 12mm.

With wide frequency range, the 4D vibration damper can highly consume vibration energy, and effectively dissipate the energy caused by cable Aeolian vibration, reduce cable vibration horizontal, ...

Big vibration amplitudes may result in damages to the cable due to bending and fatigue loads. This decreases a cable's durability and may even endanger structural safety.

Discover how OPGW cable vibration dampers mitigate wind-induced vibrations, reducing fatigue and extending the lifespan of overhead fiber optic cables. Learn about their design, benefits, ...

Vibration dampers are widely used to control aeolian vibration of the ADSS cable and earth wires including optical ground wires (OPGW). When the damper is placed on a vibrating conductor, ...
