

North Pole Fiber is important in establishing resilient fiber routes in Northern Sweden, from Kiruna to the Norwegian border, to be extended to the Arctic Ocean coast where Polar Connect will land.

Far North Fiber wants to build a 14,000km cable connecting Nordics to Japan, via Greenland, Canada, and Alaska. Its route is similar to Polar Connect, other than that it will loop ...

A recent flourishing of submarine fibre optic cables, however, has provided Norway with direct, secure and fast links to the main data hubs on the continent. This, in turn, opens the door for ...

GlobalConnect, a digital infrastructure and data communication provider, has begun laying a new submarine fiber-optic cable across the Kattegat to improve digital connectivity between ...

We distribute building materials, fiber technology, and electronic hardware while coordinating ground works, cable trenching, and network installations across the Nordics.

A project to build a submarine fibre-optic cable linking Europe to Japan along the Arctic seabed has secured its first investment, announced the project's developers on Friday, 2 December ...

The project is part of the Polar Connect initiative, where the long-term plan is to connect the Nordic region with Japan and South Korea through a fiber optic cable under the Arctic Ocean, ...

At NOS A/S, we supply high-performance equipment for subsea cable operations--engineered for tough conditions and critical precision. From route clearance to cable protection, we support every phase of ...

The cable connects with vital transatlantic crossings Havfrue (DK), Leif Erikson (NO) and other planned Trans-Atlantic cables. The IOEMA system will be the first submarine fibre optic cable ...

The project is a big leap towards establishing a direct fiber optic connection between the European Union and Asia, bridging the gap in the data transmission network.
