

FS introduces the N8550-24CD8D, a high-performance 200G switch enabling AI storage access and smooth 100/200G to 400G data center network upgrades.

Discover Nordic Semiconductor's range of products to support your next project.

Get answers to the most common questions about our 64-port 200G data center switch with Teralynx and Enterprise SONiC--covering latency, AI/HPC readiness, VXLAN, telemetry, and ...

Purpose-built for hybrid infrastructure upgrades and AI workloads, the switch delivers high throughput, flexible port design, and seamless scalability to support next-generation networking...

FS 100/200G bare metal switches with high-performance switch chip provides powerful hardware switching capacity and data center features (supporting stacking, MLAG, PFC, ECN, VXLAN, EVPN, ...

Connecting to the core (spine layer) of data networks through 400G uplinks, the switch features 24 200G ports, each capable of being split into two 100G ports or four 50G ports. This ...

FS N8510-24CD8D 200G switch offers a stable and reliable solution for both 400G network migration and AI storage network deployments. Powered by the Broadcom Trident 4 chip, it ...

NADDOD's 200G modules come in QSFP56, QSFP-DD form factor shape, support 200G InfiniBand, Ethernet and are used over Single-Mode and Multi-Mode Fiber as a media.

Explore the FS N8510-24CD8D, a future-ready 200G data center switch built for high-density, scalable, and lossless networking. This guide covers specifications, module and cable compatibility, ...
